

PRECISION COLLECTION®

Commercial HVAC Database

The Precision Commercial HVAC Database gives you the information you need to begin estimating productively right away. Thousands of standard industry items—from boilers and chillers to ductwork—are included to get you started. Just add your own pricing and you're ready to go.

You can also customize the database to fit your unique needs. Precision makes it easy to add your own items, formulas, assemblies, productivity and conversion factors to the database as you estimate.

The database also includes Smart Assemblies™ that let you take off even the most complicated building component, like ductwork, in one step. For example, when taking off a run of ductwork, simply enter one set of dimensions and the assembly will generate labor and material costs for the ductwork, fittings, hangers and more.

General Database Specifications

- More than 12,400 Items
- More than 200 Formulas
- 161 Smart Assemblies
- 80 Bill of Materials Classes

Division

Number of Assemblies

General Conditions	2
