

PRECISION COLLECTION®

Commercial/ Residential Landscaping Database

The Precision Commercial/Residential Landscaping Database gives you the information you need to begin estimating productively right away. Thousands of standard industry items—from soil and plants to irrigation components—are included to get you started. Just add your own pricing and you're ready to go.

You can also customize the database to fit your unique needs. Precision makes it easy to add your own items, formulas, assemblies, productivity and conversion factors to the database as you estimate.

The database also includes Smart Assemblies™ that let you take off even the most complicated building component, like irrigation system piping, in one step. For example, when taking off a lateral line of irrigation system pipe, simply enter one set of dimensions and the assembly will generate labor and material costs for the pipe, trenching, backfill and more.

General Database Specifications

- More than 1100 Items
- More than 190 Formulas
- 28 Smart Assemblies
- 28 Bill of Material Classes

Division	Number of Assemblies
Landscaping	8
Irrigation	11
Drainage	1
Paving	2
