

PRECISION COLLECTION®

Commercial Steel Database

The Precision Commercial Steel Database gives you the information you need to begin estimating productively right away. Thousands of standard industry items—from channel beams to columns—are included to get you started. Just add your own pricing and you're ready to go.

You can also customize the database to fit your unique needs. Precision makes it easy to add your own items, formulas, assemblies, productivity and conversion factors to the database as you estimate.

The database also includes Smart Assemblies™ that let you take off even the most complicated building component, like a channel beam, in one step. For example, when taking off a channel beam, simply enter one set of dimensions and the assembly will generate labor and material costs for the plates, angles, stiffeners, clips, drill time and surface prep items.

General Database Specifications

- More than 8900 Items
- More than 1500 Formulas
- 52 Smart Assemblies
- 318 Bill of Materials Classes

Division

Number of Assemblies

Beams - Channel	10
Beams - S Shape	12
Beams - W Shape	15
Beams - Additional Connections	1
Columns - W Shape	7
Columns - Additional Connections	1
