

PRECISION COLLECTION®

## Viewer

It's no secret that communication is vital to the success of any project. But often estimate reviews and project updates with management and co-workers can demand more time than you have to give. With Precision Viewer, you can streamline these processes and more easily keep all members of the project team well informed.

Viewer makes it possible for anyone connected to your network to view and print Precision estimates. In addition, users have access to all the advanced sorting and reporting capabilities previously only available to estimators using Precision. So, at any time, someone can quickly see where costs and quantities have varied between two similar projects. Or zero in on where unit costs have changed between conceptual, interim and final estimates. Good information to have when making management decisions.

With Viewer, you have a safe way to share your estimate information. No take-off, database-editing or spreadsheet-editing capabilities are available in the software. So you can be sure your data will remain intact, no matter how many people are reviewing it.

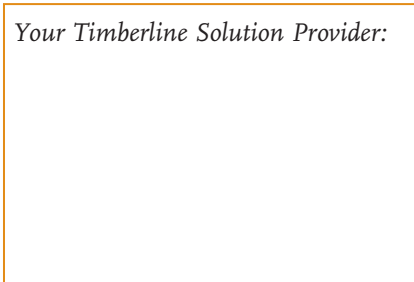

Best of all, instant, electronic access to estimate information for others means you no longer need to spend valuable time circulating estimates from one party to another.

### Product Features:

- Runs on Microsoft® Windows® 95/98 and NT® operating systems
- Provides user with read-only viewing of Precision estimates
- Gives user all the sorting, reporting and printing capabilities available in Precision Estimating Extended
- Keeps data safe, as no takeoff, database-editing or spreadsheet-editing capabilities are available

**Viewer** is part of Timberline's Precision Collection—a full line of estimating products based on Timberline's more than 25 years of experience on the leading edge of construction software technology.
